

To Whom It May Concern:

We are writing to recommend the services provided by Service First Processing (SFP). Over the years SFP has always been exceptional in facilitating credit card and electronic payment processing for our business.

Thousands of transactions run through our business and SFP has always taken the time thoroughly address any concerns or issues we had in managing the data. Moreover, through SFP we have seen a significant reduction in credit card fees and a higher level of expertise compared to our previous merchant providers.

Our experience working with SFP has been nothing but positive. Again, we recommend SFP to any business looking to add or switch their payment processing options.

Sincerely,

Leland Smith
President, Service Champions Heating & Air Conditioning
